

YOUR NETWORK FOR FIBER-BASED
HIGH-PERFORMANCE APPLICATIONS

NETWORK

Composites United is the leading network for fiber-based high-performance applications with approximately 350 members worldwide from industry and applied research.

We promote the industrial use of hybrid high-performance lightweight composite materials and support their sustainable use.

OVERVIEW
ONLINE

PORTFOLIO

Membership of the CU offers access to a strong cross-industry network, exclusive access to knowledge, targeted market positioning and joint innovation promotion along the entire value chain of high-performance fiber composite materials.

It strengthens visibility, enables synergies and opens up new business opportunities in a dynamic environment.

TECHNOLOGY

Promoting know-how & technology
e.g. in over 45 working groups and numerous funded projects

NETWORK

Connecting people from the composites industry
e.g. at joint booths and over 100 events per year

KNOWLEDGE

Providing further education & market information
e.g. in the annual CU further education program and in material-specific market reports

INTERNATIONALIZATION

Enabling market access
e.g. through international CU branches, delegation trips, partner networks and projects

COMMUNICATION

Sharing information & inspiration
e.g. in the member magazine "CU reports" and weekly CU industry newsletter
